DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of Nachaliel (20020183645) teaches a method and apparatus for screening cancer cells. The method includes providing a malignancy score to a breast based on impedance measurements taken from a portion of the breast including the nipple. By determining whether a breast includes abnormal impedance values in the area of the nipple it may be determined whether the breast includes cancerous or pre-cancerous tissue. The patient malignancy score provides an indication on the probability of the patient having breast cancer without relating to which breast may have the cancer. The apparatus comprises a sensing unit including a probe capable of sensing electrical signals from a surface of a breast, processor operative to generate, based on sensed signals, a malignancy score relating to the need of additional testing of the breast. Nachaliel lacks teaching a method and apparatus comprising a processor calibrated to classify less than 50% of the women tested in low risk as belonging to the high risk group and wherein the high risk group has a risk factor of at least twice that of the low risk group, but less than 15 times that of the low risk group.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
